MA-15
Full Range

MA-15E
Full Range

MA-15

The MA-15 is a 2-way full range loudspeaker system. Includes a 15inch LF driver and a 3inch compression driver. The MA series provides a completed set of sound reinforcement instrument to satisfy the highest demands of audio professionals for both fixed installation and rental markets. The MA series delivers an ultimate sonic performance in a compact and multi-purpose package. Setting up MA enclosures is quick and easy due to the unique integrated flying hardware system which ensures precision, safety and full compatibility with current rigging safety standards. Its compact and wedge-shaped format makes MA series equally suitable to sound reinforcement applications such as front of house, floor monitor and distributed systems.

MA-15E Constructed with European made Drivers

The MA-15E is a 2-way full range loudspeaker system. Includes a 12inch LF driver and a 3inch compression driver. The MA series provides a completed set of sound reinforcement instrument to satisfy the highest demands of audio professionals for both fixed installation and rental markets. The MA series delivers an ultimate sonic performance in a compact and multi-purpose package. Setting up MA enclosures is quick and easy due to the unique integrated flying hardware system which ensures precision, safety and full compatibility with current rigging safety standards. Its compact and wedge-shaped format makes MA series equally suitable to sound reinforcement applications such as front of house, floor monitor and distributed systems.

MA-15.2 Constructed with European made Drivers

The MA-15.2 is a 2-way full range loudspeaker system. Includes a 15inch LF driver and a 2inch compression driver. The MA series provides a completed set of sound reinforcement instrument to satisfy the highest demands of audio professionals for both fixed installation and rental markets. The MA series delivers an ultimate sonic performance in a compact and multi-purpose package. Setting up MA enclosures is quick and easy due to the unique integrated flying hardware system which ensures precision, safety and full compatibility with current rigging safety standards. Its compact and wedge-shaped format makes MA series equally suitable to sound reinforcement applications such as front of house, floor monitor and distributed systems.
